I OPPOSE THE DRAFT M.O.U. being proposed by the FDA. In particular, I OBJECT to the definition of "inordinate amount" which restricts the availability and the right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies.

COMMENTS: I am unable to use synthetic hormones & due to multiple health problems, I require compounded hormones to alleviate symptoms of anxiety, sleeplessness and depression. These help me to have a much more productive life. Without these compounded meds I could not function normally. I look at them as a life-saver, since I am unable to take any synthetic meds for hormone replacement. I feel my doctor knows what's best for me and I feel it should remain that way. I am opposed to the "inordinate amount of meds" definition. This could restrict my quality of life.
